

Stop the burn

Gard **X**[®]
protection

**ENGINE/FUEL CLEANING
SYSTEMS**

Facts

GardX specialise in formulating and creating products that improve the economy, performance and efficiency of both petrol and diesel engines.

GardX Petrol System Cleaner

-  Cleans fuel lines & injectors
-  Cleans the carburettor
-  Cleans intake ports & valves
-  Cleans compression rings
-  Increases fuel economy

GardX Diesel System Cleaner

-  Cleans the fuel lines & injectors
-  Cleans intake ports & valves
-  Increases fuel pump efficiency
-  Increases fuel economy

GardX Oil Flush Primer

-  Removes gums & sludge from crankcase
-  Cleans oilways and lower galleries
-  Restores oil circulation
-  Restores cylinder compressions

GardX[®] protection

The Problem

The internal combustion engine is an essential part of everyday life. Increasingly it is seen to be a major cause of atmospheric and environmental pollution, contributing to the problem of global warming.

Increasing advances in technology dictate higher operating conditions in modern engines, this prompts even tighter limits on the fuel systems. Black carbonaceous deposits form on critical parts of the engine which are proven to have a detrimental effect to engine performance, which causes;

Higher fuel cost
Loss of power
Sticking valves
Carbon build
Higher emissions

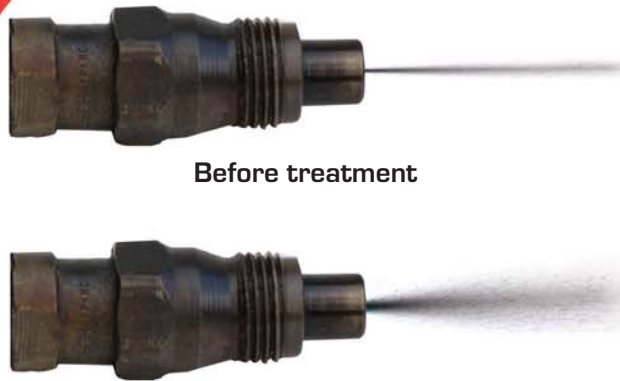

Contaminated Valve

After cleaning with GardX

The Solution

When your vehicle is treated with GardX engine or fuel cleaning systems it enables vital engine components to not only work at their optimum performance but will ensure these parts stay clean for up to six months.

Our product range helps clean and restore performance and fuel economy - saving you money.

Before treatment

After treatment - improved fuel spray and more efficient burn.

The Product

Petrol System Cleaner

Designed for fuel tank application it removes gums, tars, varnishes, lacquers and the carbons that build up between extended service intervals in vehicle fuel lines, injectors, intake ports, intake valves and compression rings. It restores lost engine efficiency, improves economy and reduces emissions.

Diesel System Cleaner

Introduced into the fuel tank it removes gums, tars, varnishes, lacquers and the carbons that build up between service intervals inside vehicle fuel lines, injectors, intake ports, intake valves and compressions rings. It reduces engine smoke and particulates.

Oil Flush Primer

For use in both petrol and diesel engines and also recommended for manual gearboxes and differentials. It removes gums, tars, varnishes, sludge, carbon and corrosive acids from the crank case, galleries, oil ways, lower piston rings and all areas where oil circulates under pressure. It restores oil circulation and cylinder compressions, improves economy and reduces harmful emissions.

Good news for the planet, and for your pocket too!
The Perfect Balance.

GardX[®]
protection

IS YOUR ENGINE SUFFERING?

As vehicle manufacturers increase the required periods between services, lost performance, increased fuel consumption and the probability of increased emissions are all too common signs of an engine in need of the GardX cleaning systems.

The Perfect Balance
