SECTION 4: First aid measures

4.1 Description of first aid measures

- General information:** If in doubt, get medical attention promptly. Show this Safety Data Sheet to the medical personnel.
- Inhalation:** Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Loosen tight clothing such as collar, tie or belt. Get Medical attention if symptoms are severe or persist. Place unconscious person on their side in the recovery position and ensure breathing can take place.
- Ingestion:** Rinse mouth thoroughly with water. If in doubt, get medical attention promptly. Due to the small packaging, the risk of ingestion is minimal. Do not induce vomiting unless under the direction of medical personnel.
- Skin contact:** Remove contamination with soap and water or recognized skin cleansing agent.
- Eye Contact:** Remove any contact lenses and open eyelids wide apart. Rinse with water. Get medical attention if any discomfort continues.
- Protection of first aiders:** First aid personnel should wear appropriate protective equipment during any rescue.

4.2 Most important symptoms and effects, both acute and delayed

- General information:** The severity of the symptoms described will vary dependent on the concentration and the length of exposure.
- Inhalation:** Spray/mists may cause respiratory tract irritation.
- Ingestion:** Due to the physical nature of this product, it is unlikely that ingestion will occur.
- Skin contact:** Repeated exposure may cause skin dryness or cracking.
- Eye contact:** Vapour or spray in the eyes may cause irritation and smarting. Particles in the eyes may cause irritation and smarting.

4.3 Indication of any immediate medical attention and special treatment needed

Special treatment: Treat symptomatically.

SECTION 5: Firefighting measure

5.1 Extinguishing media

- Suitable extinguishing media:** The product is flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog.
- Unsuitable extinguishing media:** Do not use water jet as an extinguisher, as this will spread the fire.

5.2 Special hazards arising from the substance or mixture

Special hazards: Containers can burst violently or explode when heated, due to excessive pressure build-up. Bursting aerosol containers may be propelled from a fire at high speed. If aerosol can are ruptured, care should be taken due to the rapid escape of the pressurized contents and propellant. Vapours may form explosive mixtures with air.

SAFETY DATA SHEET

GardX GX-03-1SA Bio One Shot Aerosol 150ml

According to Regulation (EC) No 1907/2006, Annex II, as amended. Commission Regulation (EU) No 2015/830 of 28 May 2015

Revision date: 16/05/2020. Revision: 2

Hazardous combustion products: Thermal decomposition or combustion products may include the following substances: Toxic gases or vapours. Carbon monoxide (CO). Carbon dioxide (CO₂).**5.3 Advice for fire-fighters****Protective actions during firefighting:** Avoid breathing fire gases or vapours. Evacuate area. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. If a leak or spill has not ignited, use water spray to disperse vapours and protect men stopping the leak. Control run-off water by containing and keeping it out of sewer and watercourses. If risk of water pollution occurs, notify appropriate authorities.**Special protective actions during firefighting:** Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Firefighter's clothing conforming to European standard EN469 (including helmets, protective boots and gloves) will provide a basic level of protection for chemical incidents.**SECTION 6: Accidental release measures****6.1 Personal precautions, protective equipment and emergency procedures****Personal precautions** Wear protective clothing as described in Section 8 of this safety data sheet. No action shall be taken without appropriate training or involving any personal risk. Evacuate area. Provide adequate ventilation. No smoking, sparks, flames or other sources of ignition near spillage. If aerosol cans are ruptured, care should be taken due to the rapid escape of the pressurized contents and propellant. Take precautionary measures against static discharges.**6.2 Environmental precautions****Environmental precautions:** Avoid discharge into drains or watercourses or onto the ground. Not considered to be a significant hazard due the small quantities used.**6.3 Methods and material for containment and cleaning up****Methods of cleaning up:** Clear up spills immediately and dispose of waste safely. Eliminate all ignition sources if safe to do so. No smoking, sparks, flames or other sources of ignition near spillage. Under normal conditions of handling and storage, spillages from aerosol containers are unlikely. If aerosol cans are ruptured, care should be taken due to the rapid escape of the pressurized contents and propellant. Provide adequate ventilation. Small Spillages: Wipe up with an absorbent cloth and dispose of waste safely. Large Spillages: If the product is soluble in water, dilute the spillage with water and mop it up. Alternatively, or if it is not water-soluble, absorb the spillage with an inert, dry material and place it in a suitable waste disposal container. Wash thoroughly after dealing with a spillage. For waste disposal, see Section 13.**6.4 Reference to other sections****Reference to other sections:** For personal protection, see Section 8. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. For waste disposal, see Section 13.**SECTION 7: Handling and storage****7.1 Precautions for safe handling****Usage precautions:** Read and follow manufacturer's recommendations. Wear protective clothing as described in Section 8 of this safety data sheet. The product is flammable. Avoid exposing aerosol containers to high temperatures or direct sunlight. Keep away from heat, hot surfaces, sparks, open flame and other ignition sources. No smoking. Do not spray on an open flame or other ignition source. Do not pierce or burn, even after use. Spray will evaporate and cool rapidly and may cause frostbite or cold burns if in contact with skin. Do not expose to temperatures exceeding 50°C/122°F. Avoid inhalation of vapours and spray/mists. Avoid contact with eyes.**Advice on general occupational hygiene:** Good personal hygiene procedures should be implemented. Wash contaminated skin thoroughly after handling. Take off contaminated clothing and wash it before reuse. Do not eat, drink or smoke when using this product. Wash after use and before eating, smoking and using the toilet.**7.2 Conditions for safe storage, including any incompatibilities****Storage precautions:** Store away from incompatible materials (See Section 10). Keep away from oxidizing materials, heat and flames. Store in a cool and well-ventilated place. Protect from sunlight. Keep containers upright. Protect containers from damage. Do not expose to temperatures exceeding 50°C/122°F. Do not store near heat sources or expose to high temperatures. Store in accordance with national regulations.**Storage Class:** Chemical storage. Aerosol containers and lighters.**7.3 Specific end use(s)****Specific end use(s):** The identified uses for this product are detailed in Section 1.2.**SECTION 8: Exposures controls/personal protection****8.1 Control parameters Occupational exposure limits****Petroleum gases, liquefied:** Long-term exposure limit (8-hour TWA): WEL 1000 ppm 1750 mg/m³
